## SUMMARY

Full Stack Web Developer with a background in the medical device industry and a graduate of the Coding Boot Camp at the University of Utah. Passionate about creating applications that use the most current technologies and the best industry standards.

## TECHNICAL SKILLS

**Experience:** Javascript, Node.js, React, MySQL, HTML, CSS and more.

## PROJECTS

**GoogleBooks** | [github.com/thomasdylan/GoogleBooks](https://github.com/thomasdylan/GoogleBooks) | [google-books-dt.herokuapp.com](https://google-books-dt.herokuapp.com)

- Search for books using google's API and save them to a list for later
- Project created as a bootcamp homework.
- Uses a MERN stack and axios to handle API requests.

**MongoScrapper** | [github.com/thomasdylan/MongoScrapper](https://github.com/thomasdylan/MongoScrapper) | [hardtimesscraper.herokuapp.com](https://hardtimesscraper.herokuapp.com)

- This site scrapes news stories from the parody news site hard-times.net and allows users to add comments to the stories they want.
- Project created as a bootcamp homework.
- Uses express, express-handlebars, mongoose, mongoDB, cheerio and axios.

**Memory Game** | <https://github.com/thomasdylan/Clicky-Game> | [thomasdylan.github.io/Clicky-Game](https://thomasdylan.github.io/Clicky-Game)

- A small memory game where you click each picture. If you click the same picture twice the game restarts.
- Project created as a bootcamp homework.
- Created with React and uses React-Bootstrap for styling.

## EXPERIENCE

**Service Technician**

2016 – Current

**Biofire Diagnostics**

Salt Lake City, UT

Responsible for diagnosing and repairing DNA analyzers and computers used in hospitals across the world. Used Lua scripts to troubleshoot issues and determine causes of failure.
